Preventive Nutrition® Menopause Support Formula contains clinically studied ingredients and a lifestyle program to support women experiencing the common symptoms of menopause.* This comprehensive formula helps support a wide spectrum of menopausal concerns such as hot flashes, night sweats, mood swings, bone density loss, forgetfulness and decreased arousal.*

Hormone Balance Blend – Combines a potent blend that includes Sophora japonica fruit extract, which has been clinically studied for its role in menopause support, with traditional black cohosh and hops standardized to provide additional support.* This formula also features ultra-concentrated GLA, a prostaglandin precursor essential in the regulation of hormone balance, as well as the circulatory, nervous and immune systems.*

Strong Bone & Circulatory Support Complex – In addition to the well-known benefits of vitamin D in supporting calcium absorption and bone health, this formula also contains MBP®, a unique, clinically efficacious active protein complex that supports a woman's biological ability to build and maintain healthy bone mass.* In addition, it features 120 mg of high quality Ginkgo biloba which may help to improve memory function and increase peripheral blood flow for improved cardiovascular health.*

Energy & Metabolism Management Matrix – Key vitamins and minerals including chromium and iodine were each carefully selected to work cooperatively with a woman's body assisting in cellular energy production and other molecular activities such as the metabolism of dietary carbohydrate, fat and protein.* Glucose utilization, lipid profile balance, red blood cell production and DNA repair all require adequate levels of the essential nutrients found in the Menopause Support Formula.*

*These statements have not been evaluated by the Food and Drug Administration. This product is not intended to diagnose, treat, cure, or prevent any disease.
