Revolutionary NEW SYSTEM!

MORE MUSCLE

LESS PROTEIN

Did you know, when on calorie restricted, low-carb diets nearly 50% of the protein you consume is hijacked by the liver and converted to high priced glucose to replenish liver glycogen stores? It's NOT used for muscle tissue repair and growth! ONLY New **E2 ProCharge™** with Liver Bypass Technology is scientifically designed to largely bypass the liver, delivering more muscle building aminos directly to the muscle for greater repair and faster growth.

Developed by the creator of *Muscle Milk™* and *Cytomax™*

The E2 Performance System...

Made to allow you to train harder AND incur less damage

Take Less. Grow More. Save Money.

mTOR 4-Way Anabolic Signaling
Proprietary combination of Leucine, Citrulline, ThiolGen™ and GSH donors exert protein multiplying effect, amplifying the power of protein and signaling protein synthesis to grow new muscle.

ThiolGen™ GSH Donor Matrix
Strengthens muscle cell membranes and prevents cell leakage, GSH is incredibly anti-catabolic. Recently discovered!.

LBT (Liver Bypass Technology™)
Natural stealth strategy to sneak protein past liver, delivering pure nitrogen directly to muscles for greater net protein utilization.

Global Anabolic Benefits
Cartilage, joints and even bone become more anabolic, not just muscle. Stronger joints and bone are the foundation to strength and performance.

Cell Swelling Matrix
E2 Hydrolytes™ and Osmolytes help cells become more anabolic rapidly. Hydrated cells send anabolic signals, triggering the body to hang on to current muscle, and begin growing new muscle. This shift occurs within minutes.

ORAC Antioxidant Blend
Potent antioxidant blend of Acai Berry, Goji, Wild Blueberry, Pomegranate, Blackberry, Noni and Phosphatidylserine protect cell membranes and boost immune function.

ProteinSaver™
Mimics gold standard of mother's milk with micellar caseins, whey protein isolates, whey concentrate, whey hydrolysates (peptides) and potassium caseinate.

Targeted Protein Delivery
If your protein isn't going directly to muscle, it doesn't matter what kind it is or how much you take. If it's not E2 ProCharge much of it will be wasted.
