

FEEL THE POWER OF PLASMA

Nitric Oxide products currently on the market simply contain amino acids that are *precursors*, which are just the starting components of our body's Nitric Oxide pathways. They rely on the premise that ingesting precursors will spontaneously trigger Nitric Oxide production - a false premise that is not rooted in our bodies natural biology.

Our Plasma Water provides a next generation approach to Nitric Oxide focused supplementation by offering actual bioactive, bioidentical nitrogen species our bodies readily utilize.

Our bodies naturally generate Nitric Oxide, however, this ability can decline with age. Because of this, it is important to supplement diminished Nitric Oxide levels regularly.

Nitric Oxide is mainly involved in the circulatory system, and is responsible for telling blood vessels when to relax, and widen, which can help support an active lifestyle.*
