Food Supplement, containing digestive fibers, sea algae and ocean water concentrate. A food supplement should not be used as a substitute for a varied diet

Storage: Store on a cool, dry, dark place out of reach of young children.

Batch Nr.:**Best End Before:**

VEGAN DIGESTIVE FIBERS

PREBIOTIC FIBERS IMPROVE DIGESTION

60 CAPSULES

Each capsule contains a comprehensive mix of ingredients supporting the intestinal flora and the digestive system. Water soluble dietary fibers increase the water content and the amount of fibers and short chained fatty acids in the digestive system. Aquamin algae concentrate has a proven positive impact on the intestinal flora. This combined effect benefits both digestion and easy bowel movement, as several dozens of studies have shown.

RECOMMENDED USE: To support the digestion, adults take 1 capsule per day with a meal, or as recommended.

For children calculate according to body weight. Use as long as needed. Do not exceed the recommended daily dosage.
