

Ever find yourself in the mood for a delicious, sweet treat but don't want to jeopardize all your hard work at the gym with the extra sugar, artificial sweeteners or sodium? Here at Infinite Labs®, we focus our efforts on providing our loyal customers with only the best ingredients to not only maximize your physical results, but to also satisfy those cravings that have a habit of sneaking up on us throughout the day.*

Infinite Labs® proudly presents one of our newest protein additions – Whey Delite™. Whey Delite™ offers a unique blend of whey that compliments any morning, pre-workout, post-workout and evening regimen. With real pieces of chocolate mixed into the blend, Whey Delite™ has everything you need to support muscle growth and recovery and satisfy those late night cravings.*

Sophisticated bodybuilders and athletes necessitate specific recovery needs to enhance their athletic performance and muscle recovery. If there is one component that is critical to any training regimen, protein would more than likely be your best bet. Protein establishes the building blocks for your muscle foundation, so without it, your body lacks this critical component required for muscle development.*

Positioned even higher than chicken and fish, whey is one of the most efficiently absorbed sources of protein in the body. Maximum protein utilization is vital to aiding muscle recovery and maintaining a positive nitrogen balance, which is essential during those intense training sessions.*
