

Hormone-Free Whey Protein*

Dream Protein™ is superior because the protein is not denatured (damaged) from high-heat processing. Most of the methods used to process whey cause the proteins to be so denatured that the finished product yields only a fraction of the biologically active proteins. **Dream Protein™** contains all the essential and non-essential amino acids, plus a full spectrum of all the naturally-occurring bioactive compounds such as immunoglobulin (IgG), lactoferrin (LF) and glycomacropeptides (GMP).‡

- Immunoglobulins are antibodies that function as essential components of your immune response.
- Lactoferrin is associated with a wide range of health benefits including, immune support and anti-inflammatory action.‡
- Glycomacropeptides have recently been shown in studies to help with weight management and reduction of leptin and adipose tissue.‡
