

Suggested Usage: Take 1 tablet 3 times daily, preferably with food.

Magnesium is a mineral that is critical for energy production and metabolism, muscle contraction, nerve impulse transmission, and bone mineralization.* It is a required cofactor for an estimated 300 enzymes.* Among the reactions catalyzed by these enzymes are fatty acid synthesis, protein synthesis, and glucose metabolism.* Malate is an important Krebs cycle intermediate, indicating that it is an important molecule in the production of cellular energy derived from carbohydrates.*
