

**Suggested Usage:** Take 2 capsules 1 to 3 times daily.

Chondroitin sulfate is a glycosaminoglycan (GAG) naturally present in many body tissues, and is an especially important component of joint cartilage and synovial tissue.\* Chondroitin promotes water retention within the joint, giving it resiliency by acting as a lubricant and a means to absorb shock.\* This nutrient thus helps to support the maintenance of healthy, flexible joint tissue and promotes proper joint mobility and comfort.\*
