

**Suggested Usage:** Take 1 capsule daily on an empty stomach. Take with 8 oz. of water, 30 minutes before a meal.

NADH (Reduced Nicotinamide Adenine Dinucleotide) is a coenzyme found in all living cells that is derived from vitamin B-3, also known as niacin.\* NADH is an essential cofactor for hundreds of biochemical reactions, and is used extensively in the production of cellular energy (ATP).\* NADH also plays a notable role in the synthesis of neurotransmitters in the brain.\* Although NADH is normally unstable outside of the body, PANMOL® NADH uses a proprietary process to naturally preserve its effectiveness, thereby delivering stable and bioavailable NADH to the body.\*
