

A Full-Spectrum Cordyceps with Maitake-D-fraction®

Cordyceps is commonly called "summer-plant, winter-worm" because of its parasitic growth on larvae. Well-known for stamina and endurance, this mushroom has gained much attention through the success of Chinese track athletes to shatter world records.* It has also been known to support healthy sexual function as well as nourishment of lungs and kidneys.*

Super Cordyceps is a full-spectrum product processed with both Cordyceps Mycelium extract and Maitake D-Fraction, enhancing its power with Maitake **D-fraction®** and its bioavailability with **BIOPERINE®**. This product does not contain any mycelium/grain mixture.
