

Suggested Usage: Take 3 softgels daily with a meal.

CLA (Conjugated Linoleic Acid) is a class of fatty acids produced by animals that is naturally found in beef and dairy products. Although CLA plays an important role in a number of cellular metabolic processes, humans are not able to produce CLA and therefore can only obtain it from the diet.* Since CLA is generally more abundant in grazing animals, changes in agricultural practices have resulted in less CLA in our foods, decreasing its availability in modern diets. Therefore, using a CLA supplement is recommended to obtain desirable levels of CLA for its optimal effects.* NOW® CLA is derived from Non-GMO safflower oil and delivers 800 mg CLA per softgel.
