

SUGGESTED USAGE: As a dietary supplement, take 1 softgel 1 to 2 times daily with food, or as directed by your healthcare practitioner.

HOW IT WORKS: Coenzyme Q₁₀ (CoQ₁₀) is a vitamin-like compound present in almost all cells, where it is necessary for cellular energy production.* CoQ₁₀ concentrations are highest in the heart, where chemical energy availability is critical. CoQ₁₀ also functions as a powerful fat-soluble free radical scavenger within cell membranes and vascular structures.*

CAUTIONS/INTERACTIONS: Coenzyme Q₁₀ may interact with anticoagulant, antihypertensive, and chemotherapy medications. Statin medications have been shown to decrease CoQ₁₀ production in the body and CoQ₁₀ supplementation may be useful when taking these drugs. Consult your healthcare professional if you are taking any of these medications before using this product. For more information on this product go to www.protocolforlife.com/P3208
