

Rapid Dissolving

NutriBiotic® Hypo-Aller C is an effervescent powder combining 100% pharmaceutical grade L-ascorbic acid (vitamin C) with an array of highly bioavailable minerals, including calcium, magnesium, potassium, and zinc, in a readily soluble form.

The vitamin C and minerals in the Hypo-Aller C react when added to a liquid to create carbonation (effervescence) to form mineral ascorbates, which are buffered and, therefore, less acidic than pure vitamin C.

Vitamin C, calcium, magnesium, potassium, and zinc are essential nutrients that help support the body. Vitamin C provides antioxidant protection to the immune system, as well as maintains the health of blood vessels, tissue, cartilage, bones, eyes, and other organ systems.* Vitamin C is also required for the biosynthesis of collagen, L-carnitine, and neurotransmitters.*

The other nutrients in Hypo-Aller C help maintain bone and immune health and regulate fluid balance, muscle contractions, and nerve signals.* The positive effects of the combined nutrients make them vital to the body's overall health.

Suggested Use: As a dietary supplement, mix 1/2 teaspoon into a glass of juice or water. Take with or without meals.
