

SUGGESTED USE: As a dietary supplement, take 3 capsules daily with food. Dr. Berg's Cod Liver Oil is not only wild-caught, but also uniquely processed.

Typical spray-drying methods use high heat and add oxygen, which create a very unstable oil powder. We use a green proprietary technology involving low heat and low oxygen to create a 98% micro-encapsulated oil powder. We also use no GMO ingredients or modified food starch.

Cod liver oil naturally has EPA and DHA as well as natural vitamin A and vitamin D. Typical cod liver oil products often have synthetic vitamin A added to their formulas. All our nutrients originate only from wild-caught cod liver oil.

We have added some purified bile salts for additional absorption of nutrients. Bile salts assist in the extraction of fat-soluble nutrients from fat and oil.

Our cod liver oil is certified by the Marine Stewardship Council (MSC), the world's leading certification standard for sustainable, wild-caught seafood. The MSC is committed to creating well-managed ocean fisheries to ensure the long-term sustainability of fish stocks and healthy marine ecosystems.

CAUTION: Do not exceed recommended dose. Pregnant or nursing mothers, children under the age of 18, and individuals with known medical conditions should consult a physician before using this or any dietary supplement.
