Bariatric Fusion Multi Collagen formula provides types I, II, III, V & X collagen with an additional joint complex blend. Collagen is the main structural component found in the body. Aging, sunlight, extreme weight loss, and environmental factors can cause damage to collagen fibers that are responsible for skin elasticity, tissue development, and joint support. This unique formula provides easily digestible collagen peptides in order to support natural collagen formation and may aid in bone and cardiovascular health, hair and nail growth, restoring skin elasticity and joint mobility.

Directions: Use 1 Scoop Daily in 8 fl oz of liquid
