

Know your Reds

Following our successful **Greens & Superfoods** release, customers demanded an equally innovative 'reds' product. We went beyond typical fruits, including exotic ones that are difficult to incorporate into daily diets. Our **Exotic Reds & Blues** supplement offers a unique combination of reds, blues, and purples, providing a broad range of anthocyanins and micronutrients.

Concentrated Superfoods

What truly makes superfoods "super" is their rich makeup of different micronutrients. To offer a diverse range of micronutrients per serving, we carefully selected fruit extracts. This blend utilizes concentrated extracts to maximize key micronutrient content in a small serving. It's similar to choosing an espresso shot over regular coffee, where a small shot equals the caffeine in 2 cups of traditional coffee. We apply the same concept here, emphasizing micronutrients for antioxidant support, derived from essential fruits that enhance the overall Exotic Reds & Blues formula.†

Warning: This product is only intended to be consumed by healthy individuals over the age of 18. Pregnant or nursing women should not use this product without first consulting their physician. Discontinue use and immediately consult your healthcare professional if you experience any adverse reaction to this product. Do not use if safety seal is broken or missing.

DIRECTIONS: Mix 1 scoop with 6–8oz water or flavored beverage. Product may clump over time and is normal for freeze-dried fruit powders. Break apart inside the container before scooping. Mixes great with our Greens & Superfoods! Separating after mixing is normal.
