

organic
Throat Coat®

Our slippery elm bark is **wild-collected** throughout the beautiful wild lands of the southern Midwest. Our collectors ramble through forests they know intimately looking for trees and branches that are appropriate for cutting. It's a delicate practice that requires a long-view—these **forests are sustainably managed** so that this important herbal resource will be available for generations to come.

The collectors must carefully strip the outer bark to get to the **prized inner (slippery) bark**, which is then dried and bundled up before it can be ground up for tea.

We've Got the Right Stuff

We raise the bar. The quality standard of the herbs we use is hard to pronounce, difficult to meet, and it's what makes us different, better. We're not ashamed to say it. **Pharmacopoeial**: it's the only quality standard our herbalists can rely on when blending teas for your health and wellness.
