

Athletes involved in sports with weight classes or in events where they are judged on aesthetics are always concerned with extra weight and water retention. Water is critical to optimal performance but athletes do not want to retain unnecessary water as it adds extra resistance to fast execution of movements necessary for sport. The best situation is called the euhydrated state or normal hydrated state.

The state of body water is affected by diet, fluid intake, time of year and even menstrual cycle. SHORT CUTZ was created for athletes to help spike metabolism, increase energy, cut fat, cut water and cut weight fast. If your sport demands fast results use SHORT CUTZ as your safe and effective short cut to optimal performance.

SHORT CUTZ is the first dietary supplement designed to cause a sharp spike in metabolism, trigger increased energy and cut water and fat weight fast. It is built specifically for high performance athletes in drug tested sports but safe for everyone to use.

For even faster results, combine
SHORT CUTZ and PROMASIL

WE HAVE MORE PROFESSIONAL ATHLETES THAN ALL OTHER SUPPLEMENT COMPANIES COMBINED
