

Nutrients to Support Healthy Joints†

Glucosamine, Chondroitin, and MSM are three ingredients that are combined to provide comprehensive joint support.† Our glucosamine complex provides a special blend of three sources of glucosamine, including glucosamine sulfate, n-acetyl d-glucosamine, and glucosamine hydrochloride.

Glucosamine is a building block of joint tissue, and helps the body manufacture substances necessary for healthy joints.† Chondroitin is a natural extract from beef cartilage and helps support soft tissue and cartilage in the body.† MSM provides naturally occurring organic sulfur, which is a necessary component for making collagen, a primary constituent of joints, cartilage and other connective tissues.† Our **Joint Max** supplement provides a combination of nutrients to support healthy joints.†

CONTAINS NO artificial colors, flavors or preservatives; no wheat, gluten, milk, eggs, peanuts, tree nuts, soy, or fish.
