

**Delicious, Clean Whey Protein Supports Lean Muscles and Good Health†**

Our whey protein is sourced from milk produced in the United States from cows not treated with rBGH (recombinant bovine growth hormone).

Whey protein supports the body's ability to maintain, increase, and repair muscle.† It also provides micro-proteins such as B-lactoglobulin, A-lactalbumin, immunoglobulin, glycomacropeptide, and lactoferrin, which are important for immune system function.†

Whey surpasses even whole eggs in its ability to deposit nitrogen in the muscle. Our **Performance Protein** has highly bioavailable undenatured proteins and branched chain amino acids (BCAA's), making it ideal to promote muscle repair, maintenance, and growth. The free-form amino acid glutamine has been added to further support muscle health.†

Our proprietary process uses only natural enzymes and high quality membrane filters to separate the whey and preserve essential nutrients. This state-of-the-art processing using low temperatures creates a complete spectrum of whey peptides, improving nitrogen retention, supporting immune system health, and promoting muscle health.† Whey supports cellular glutathione levels, one of nature's important antioxidants.†
