

TARGETED INGREDIENT TECHNOLOGIES

Nitric Oxide (NO) plays a key role in adaptation to physical exercise by optimizing blood flow, muscular contractions, nutrient uptake, and cellular energy production. MRI SURGE™ features key ingredients that help drive NO to an impressive 1250% over baseline.[^] Even better, factors of the MyoCarn Power Complex help offset exercise-induced muscle damage. That's more performance driving circulation and targeted ingredients to help you do what you do best - *train to win.**

PREPARATION: Thoroughly mix 1/2 scoop (12 g) in 8-16 oz of cold water. Drink immediately.

DIRECTIONS: Use 1/2 scoop daily. For best results, take on an empty stomach 0-30 minutes before workout

§ Ingredients in MRI SURGE™ help support healthy homocysteine levels already in the normal range and help promote exercise recovery. [^] In vitro research showed nutrients in MRI SURGE™ increased NO production in the tested cell cultures by up to 950% and 300%, which may result in nitric oxide potential of 1250%.
