EXP: 30/MAY/2027

WEATHERING SINCE 1962

COMVITA™

Honey bees are clever. They make propolis by collecting resin from trees and combine it with beeswax and enzymes to seal and protect the hive.

Bee Propolis originates from a plant's defense system and contains over 300 powerful natural bioactive compounds, flavonoids and phenolics (antioxidants) which can support immune function*.

Comvita™ is dedicated to bringing you the finest scientifically-backed pure and natural bee products that nature has to offer.

PFL™ stands for Propolis Flavonoid Level. This measures the flavonoid content in a serve of propolis. PFL30: 30mg total flavonoids per mL. Flavonoids have well known antioxidant properties.
