

Flex6 FITNESS

Colostrum6: has all of the natural non synthetic IGF-1 Super Family per serving.*

DIM (Diindolylmethane): a phytonutrient, promoting better estrogen levels in athletes so they can tap into their fat reserves instead of JUST carbs for clean reliable energy and has shown to promote testosterone levels for added performance to break those plateaus.*

Creatine Ethyl Ester HCL: is the same creatine amino acid you take from supplements and food, but this form has a higher absorption rate that gives results for energy and better workouts.*

7-Methoxy-Isofiavone: natural anabolics for steroid-like effects without any reported side effects. Helps to transport nutrients to your worked lean muscles-which in turn increases endurance. Also enhances nitrogen retention to pump out "just a little more".*

ZMA®: Increases testosterone levels, muscle strength and power, which in turn enhances muscle recovery and regeneration processes.*
