

RECOMMENDED USE: CHAIN DRIVE™ can be consumed pre or post workout and/or during training and can be stacked with your favorite pre and post workout supplement. CHAIN DRIVE™ can also be combined with PROTEIN RUSH® or SRO ZERO CARB PROTEIN® to create a meal replacement shake. Always drink 12 to 16 ounces of additional water with each CHAIN DRIVE™ drink.

CHAIN DRIVE™ is the latest innovation from VPX that features solubilized BCAAs, which are shown to have superior bioavailability versus other types of BCAAs. This solubilization technology gives stability to BCAAs in a liquid solution, with NO foam and NO wasted powder at the bottom of your container!

BCAAs, which constitute links in a protein chain, are essential for a variety of functions, including increased muscle protein synthesis, decreased muscle soreness, and have a muscle-sparing effect on muscle tissue. They are essential for performance, endurance, and recovery. Furthermore, leucine is the most important of the BCAAs, and studies have shown that leucine can help maintain strength and improve exercise performance.

CHAIN DRIVE™ is a very versatile product. Consume CHAIN DRIVE™ prior to a fasted workout, during a workout or athletic event, or post-workout with PROTEIN RUSH® or SRO ZERO CARB® for maximum recovery and muscle protein synthesis.

*When combined with increased exercise and a healthy diet.
