

Bioidentical Polypeptides™ Spray contains 10 to 40 times more bioactive peptides than regular bovine colostrum which help activate and control the production and regulation of cytokines. These signaling polypeptides provide the instructions to the body to maintain immune homeostasis.

Instructions: 2 sprays once or twice a day. For best results spray directly into mouth and swallow. Advanced use: spray may be repeated 4 times a day.

Storage: Store at room temperature. Can be refrigerated. Use within 60 days of opening.
