CIRCULATION & VEIN SUPPORT™ FOR HEALTHY LEGS

Diosmin | Butcher's Broom | Horse Chestnut
Hesperidin | Rutin | Grape Seed | Pine Bark

Dietary Supplement | **360** Easy-to-Swallow Capsules

CIRCULATION AND VEIN SUPPORT is a blend of the most effective, clinically studied natural ingredients to promote healthy circulation in the legs and provide relief to their challenged tissues and veins. This unique formula is designed to combat the natural swelling of the veins and tissues of our legs that occur with aging, overweight and our daily activities. The blood vessels in our legs are perhaps the most challenged in our body and, as a result, our feet, ankles and calves can swell, enlarge and experience discomfort. This normal process is intensified by aging, overweight and prolonged sitting or standing. Our primary ingredient, diosmin is the most researched natural ingredient for promoting healthy leg circulation. It has been recommended by physicians in Europe for over 70 years for swollen, heavy, uncomfortable legs, as well as to promote the healthy function and appearance of leg veins. We also add extracts of both butcher's broom and horse chestnut – two natural ingredients utilized traditionally for centuries in Europe. Both ingredients have been clinically shown to relieve tired, heavy legs and promote optimum leg vein health and appearance. We also add the protective benefits of hesperidin, rutin, pine bark and grape seed. In short, **Circulation and Vein Support** is designed to provide a visible, tangible difference to the circulation, tissues and veins of our legs. Its unique proprietary blend of diosmin, butcher's broom and horse chestnut provide a natural, clinically validated response to the enormous demands we place on the already challenged circulation in our legs.
