COENZYME Q-10 200 MG with Vitamin D3 1000

Complete B-Complex · Vitamin C 300
with Methyl B12 & Methyl Folate

Dietary Supplement | **240** Easy-to-Swallow Capsules

COENZYME Q-10 200 with Vitamin D3 1000 is more than the finest, natural source of our body's most critical energy nutrient (CoQ10). It also provides the world's most sophisticated high potency B-complex formula, including our absorption-protected natural B12 (methylcobalamin), as well as our unique methyl folate form of folic acid. Thirty-five years of working with CoQ10 has taught us that no CoQ10 formula can guarantee its benefits without all the essential B-vitamins. Our CoQ10 also includes high levels of vitamin C given the established relationship between these two vital protective nutrients. This special formula also provides, at no additional cost, 1,000 IU of vitamin D3 given its essential role in many of our body's most vital processes, along with the knowledge that a substantial majority of Americans possess insufficient or deficient levels of this critical vitamin. CoQ10 is essential for all energy production and therefore, for life itself. Sadly, CoQ10 levels decline with age, stress, diet, health issues and the use of the most popular drugs, such as cholesterol, blood pressure, osteoporosis and antidepressant drugs. Clearly, modern life conspires to reduce our levels of this life-sustaining nutrient. Further underscoring CoQ10's importance, is that the healthy function of our body's most hardworking organs (heart, brain, liver, kidneys, pancreas) requires the body's highest levels of CoQ10. It is this direct connection between CoQ10 and our most vital organs that provides an unparalleled opportunity to promote abundant energy and optimum health. This uniquely comprehensive and economical formula provides an exceptional opportunity to benefit from what many consider to be nature's most important nutrient.
