GREEN TEA EGCG 200™

200 mg Epigallocatechin Gallate
Green Tea's Concentrated Protection

Dietary Supplement | **360** Easy-to-Swallow Capsules

GREEN TEA EGCG 200 provides high levels of **EGCG** (Epigallocatechin Gallate) – the polyphenolic molecule principally responsible for the benefits of Green Tea. **EGCG** is highly concentrated in green tea, but also present in healthy dark chocolate. In addition to its remarkable 200 mg of water-extracted **EGCG**, this formula also provides 200 mg of other protective green tea polyphenols. For centuries, green tea has been the standard beverage of the healthy Asian diet and modern science now recognizes the wide-ranging health benefits associated with its consumption. **EGCG** is one of nature's most powerful protective compounds and as a result, it remains the focus of extensive anti-aging research. The heart, brain, liver, skin and eyes have all been observed to benefit from the consumption of **EGCG**. Its powerful protective benefits also enhance the activity of our body's most important internal protective compound - Glutathione. It would be hard to name a more protective, traditionally consumed and well-established natural ingredient than **EGCG** from green tea.
