- Healthy eye aging & function*

Tahiti Trader® Certified Pure™ Organic Goji is grown in some of the harshest climate conditions in the remote highlands of China, Mongolia & Tibet and used as natural medicine across Asia for over 3,000 years. The Goji berry has long been known as the "longevity fruit". Scientists believe Goji berries stimulate the release by the pituitary gland of human growth hormone (HGH) known as the "youth hormone". This ability to reverse age-related declines provides the strongest evidence of anti-aging potential.
