Made in New Zealand

Xtend-Life's Green Lipped Mussel powder is a 100% natural product from selected mussels cultured in the pristine waters of Marlborough, New Zealand.

These mussels are processed using a proprietary method that enables ALL the components of the mussel to remain intact. Fresh live mussels are converted to the finished powder in a little over 30 minutes.

This ensures unequalled freshness, and because this process does not require cooking, all of the valuable fractions of the mussels are preserved.

A typical analysis of Xtend-Life's Green Lipped Mussel Powder:

45% proteins and essential amino acids

30% mucopolysaccharides, chondroitins and marine collagens

12% natural vitamins (A, B complex, D, E), minerals and trace elements

10% marine lipids (including omega-3 fatty acids)
