TURMERIC & GINGER EXTRACTS

Soothing Relief for Joints & Digestion
Extremely Rich in Protective Compounds

TURMERIC & GINGER EXTRACTS provides standardized extracts of related plants that offer soothing relief to our joints and digestive system. Turmeric is a centuries-old traditional medicine and Asian spice that is also the main flavor in Indian curry. Clinical science now validates the science behind Turmeric’s extensive health benefits; however, delivering those benefits requires more than “spice in a pill.” As a spice, flavor is what matters, but in a beneficial supplement, Turmeric’s protective curcuminoids require special attention. To enhance its activity, we complex our Turmeric with phosphatidylcholine (PC) – the most important phospholipid in our liver and brain. This unique complex ensures optimum benefits by protecting Turmeric’s curcuminoids from digestive damage and rapid excretion. Ginger Root has also been used for centuries as a traditional medicine and popular spice. Ginger was among the first spices brought to the New World and it has been soothing overworked joints and upset stomachs for centuries. Unlike typical Ginger spice, our Ginger is standardized to provide high levels of the all-important gingerols. In short, **Turmeric and Ginger Extracts** delivers natural, soothing relief for our challenged joints and sensitive digestive system.
