

HYDROLYZED AVIAN COLLAGEN TYPE II

kollaGen II-xs™ capsules are naturally sourced from avian chicken sternum cartilage. Hydrolyzed collagen type II supplies the body with 18 amino acid peptides that are the protein building blocks for healthy articular cartilage support throughout the extracellular matrix. In addition, kollaGen II-xs™ has naturally occurring hyaluronic acid, glucosamine and chondroitin sulfate, which are nutritive amino sugars that work in synergy with proteoglycans and glycosaminoglycan (GAG). Nature's complete joint health starts with food grade nutrients, along with the precise hydrolyzed Dalton weight of 20kDa that ensures all the peptides and amino sugars are intact for optimum assimilation.*

WARNING: Keep out of the reach of children and consult with a physician before taking this product if you are pregnant, nursing or have a medical condition.
