

WE SUPPLEMENT THE FIT TO BECOME THE FITTEST

CITRULLINE MALATE is a synergistic compound containing L-Citrulline, a nonessential amino acid and malic acid. These ingredients work together to raise arginine and ornithine plasma levels, more efficiently and effectively than l-arginine alone. Higher arginine levels, naturally promotes the production of nitric oxide, which supports greater endurance, muscle force, power, and delays muscle fatigue.*

SUGGESTED USE: Mix one scoop with 8oz of water, before, or during training for optimal performance and results.

WARNING: Consult with a physician prior to use if you have any medical conditions. Do not use if pregnant or lactating.
