- Wobenzym® N has a long history of efficacy and consumer satisfaction

Fuel Your Health

Enzymes are fascinating and essential biological catalysts that are involved in almost every single process in our bodies. In fact, thousands of enzymes drive trillions of chemical reactions every second. They are involved in everything from breathing and blood flow to the transmission of neural impulses to immune system maintenance.

Systemic enzymes work holistically — meaning they work throughout the entire body — supporting the body's natural response to inflammation and overall joint health.

Join the millions of satisfied users worldwide and let Wobenzym® N fuel your health and get back to living life — on **your terms**.

Wobenzym® N

Systemic Enzyme Formula

Wobenzym® N is the authentic systemic enzyme formula trusted by millions worldwide to provide clinically demonstrated support for joint and inflammation health.†

First introduced in Germany as a pharmaceutical over 40 years ago, Wobenzym® N has been updated but still features the time-tested, synergistic combination of plant-based enzymes, pancreatic enzymes and antioxidants. These powerful yet delicate enzymes are protected by a vegetable-based enteric coating which ensures optimal absorption and utilization in the blood stream.†

Whole Body Benefits

Wobenzym® N works holistically — throughout your entire body — to support your body's natural response to inflammation.†

While inflammation in the body is a normal and natural response, the aches, pains and muscle soreness that often accompany it can keep you from living the active lifestyle you desire. Experiencing extraordinary health is all about helping the body achieve homeostasis — a dynamic state of balance.

If you want to take control of **your life** and live it on **your terms**, choose the brand that has been trusted by millions worldwide for decades — choose **Wobenzym® N**.

"As a triathlete and physician, I have personally used Wobenzym® N and have recommended it to patients successfully for more than a decade."

Joseph Brasco, M.D.
