

DO NOT EXCEED RECOMMENDED DAILY DOSAGE NUTRACEUTICAL FACTS:

NOW WITH NITROSIGINE® FOR EVEN GREATER PUMPS!†

For nearly a decade, NITRAFLEX® has been the name you trust when it comes to pre-workout formulas. And now, NITRAFLEX ups the ante by introducing Nitrosigine to the mix, and adding even more pure Citrulline to the formula. This 1-2 punch greatly increases pumps beyond expectations. The volume has been turned up on the energy, focus and flavor as well. Lastly, there's no more artificial dyes in the formulas. All in all, this is the strongest and best-tasting NITRAFLEX yet!

PHYSIOLOGICAL BASIS: "Reactive hyperemia" describes the increase in muscle blood flow that occurs during high-intensity resistance exercise and produces the "pump" associated with increases in muscle size. The NITRAFLEX pre-training formula contains ingredients that in animal, *in vitro* and clinical studies suggest possess properties that may help advanced athletes maximize energy, intensity, vascularity and reactive hyperemia (pumps) during their workouts, and provide long-term support of testosterone and Nitric Oxide levels in the healthy range when used as directed.‡

UNIQUE PROPERTIES OF SOME OF THE KEY COMPOUNDS IN NITRAFLEX:

■ **POWERED BY NITROSIGINE:** This new formula boasts Nitrosigine as its only source of Arginine. Nitrosigine has been shown to inhibit the enzyme responsible for breaking down Arginine, making it the superior choice of arginine supplementation and a perfect synergistic partner to L-Citrulline.‡

Nitrosigine has scientifically validated that benefits last up to 6 hours after dosing. In addition to vasodilation (pump) and overall performance-enhancing benefits, Nitrosigine is clinically shown to increase mental focus, making it a truly well-rounded and multi-faceted addition to any effective pre-workout formula.‡

■ **1-SCOOP SERVING:** NITRAFLEX is so potent, only 1 scoop (1 serving) is necessary. Do not exceed 1 scoop in a single 24-hour period. Do not take NITRAFLEX within 5 hours of bedtime.

■ **200mg OF BORON CITRATE IN EVERY DOSE OF NITRAFLEX:** This trace mineral has been shown to lower estrogen, while raising free testosterone by 28.3% in as little as 7 days!‡

■ **COGNITIVE ENHANCERS:** NITRAFLEX contains unique ratios of scientifically validated compounds that help you remain alert, intense and focused while you're flying from set to set with veins fully dilated and muscles pumped to the extreme.‡

Note: One serving contains 325mg Caffeine, 1000mg of Nitrosigine, and a clinically researched dose of Boron.‡

DO NOT USE IF NECK SEAL IS BROKEN OR MISSING. STORE IN A COOL DRY PLACE.

Nitrosigine®
Branched Arginine Silicate
Nitrosigine® including the logo, is a registered trademark of Nutrition 21, LLC. Nitrosigine® is patent protected.

RECOMMENDED DOSAGE

Begin by assessing your tolerance with half a serving of NITRAFLEX® mixed with 5oz of cold water. Consume within 30 minutes before working out. Depending on tolerance, mix 1 serving (1 scoop) of NITRAFLEX with 8-10oz of cold water and consume within 30 minutes before working out. Do not take within 5 hours of bedtime.

SPECIAL TIMES OF USE

(DO NOT TAKE MORE THAN 1 SCOOP WITHIN 24 HOURS)
Before powerlifting meets • Any type of weight training
• Anytime extreme energy/focus is needed.‡
