

Minerals are utilized by the body to support good health and its normal daily functions. Selenium is an essential trace mineral that provides antioxidant and immune support.\* It's naturally found in many foods, but the actual amount of this key nutrient is dependent on the selenium content of the soil in which it's grown or how the food is cooked and/or processed. Selenium supplementation is an easy way to ensure that the body receives the proper amount of this essential mineral. **Futurebiotics® Selenium** delivers 200 mcg per serving for antioxidant protection.\*
