

**Suggested Usage:** As a dietary supplement, take one capsule daily, preferably with a meal.

Nicotinamide (Vitamin B-3) is an essential member of the B-vitamin family that must be obtained from the diet.\* It is the precursor to Niacin, but does not cause the "flush" normally associated with Niacin intake.\* This form of Vitamin B-3 as Nicotinamide is a water-soluble vitamin.\*

Nicotinamide and Niacin are two different forms of vitamin B-3.
