

RECOMMENDED USE: Take 3 capsules prior to each meal.

STORAGE INSTRUCTIONS: Protect from heat, freezing, and humidity (above 65%). Keep container tightly closed when not in use. Keep out of reach of children.

DESCRIPTION: CULTIVATE™ is an advanced prebiotic, probiotic, and plant enzyme digestive aid specifically formulated to enhance the uptake of amino acids and other nutrients. CULTIVATE™ is fortified with a full spectrum, custom-formulated plant enzyme matrix, and its triple protease combination is designed to hydrolyze protein into free-form amino acids for easier assimilation and uptake. CULTIVATE™ makes digesting large food portions a breeze, and you'll be relieved of bloat or discomfort, even from lactose-based protein shakes. CULTIVATE™ also supports gut immunity by reducing oxidative stress and supporting cellular health and intestinal flora, especially for those with existing digestive problems. CULTIVATE™ delivers a potent array of amylase and lipase enzymes which are proven to adapt to a variety of stomach acid pH conditions and provide optimal digestion of protein, fat, carbohydrates, milk sugar (lactose), and vegetable cellulose.*

SAN products are manufactured under GMP (Good Manufacturing Practices) standards with stringent quality control guidelines. Additionally, each lot produced by SAN is independently tested for purity and potency by HPLC analysis to ensure only the highest quality ingredients in our innovative formulas.*
