

30 Capsules

Slow release capsules providing iron, zinc, copper & B vitamins

FOOD SUPPLEMENT

Food supplements must not replace a varied and balanced diet and a healthy lifestyle.

As with other food supplements, consult your doctor or pharmacist before using if you are under medical supervision, pregnant, breast-feeding, have epilepsy, haemochromatosis, suffer from food allergies, or are allergic to any of the ingredients. Made in a site that may handle nuts. Not suitable for children.

Feroglobin® Capsules have been formulated with a slow release action which is designed to be gentle on the stomach.

This product contains iron, which if taken in excess, may be harmful to very young children.

Store below 25°C in a dry place, out of sight and reach of children.

Gentle Iron to help support your haemoglobin & red blood cells

Iron is an essential mineral, which contributes to normal formation of red blood cells and haemoglobin, as well as normal oxygen transport in the body. In addition to being vital for your blood, iron also contributes to normal cognitive function and immune system function.

Iron is important for several functions in the body, but sometimes our diets are not well balanced and everyday activities, even drinking tea or coffee, may inhibit iron absorption.

Feroglobin® Capsules provide an effective source of essential nutrients alongside iron including folic acid, vitamins B6 and B12 which help to reduce tiredness and fatigue.

Feroglobin's specific blood building nutrients may be of particular benefit for athletes, and for women during the monthly cycle and throughout pregnancy.

Feroglobin® is designed with a special slow release delivery system to prevent excess iron in the stomach. It ensures that the release of blood forming nutrients is gradual and even.

Feroglobin® Liquid
is also available,
ideal for children.

- ✓ Moderate but effective level of iron
- ✓ Iron in an organic compound form
- ✓ Slow, gradual release of iron into the body

Nutritional Information		Av. per capsule	% NRV*
Vitamin B6	5 mg	357	
Folic Acid	400 µg	200	
Vitamin B12	10 µg	400
