

DID YOU KNOW?

The heart beats about 100,000 times per day. As one of the hardest working muscles, it needs magnesium. Essential to muscle function, magnesium helps support the normal rhythm of the heartbeat.*

Why Magnesium Taurate?

A heart-healthy regimen can start with a good magnesium supplement. Molecularly bound to the amino acid taurine, this compound is designed to be a heart-friendly, fast-absorbing magnesium to support healthy circulation and heart muscle function.*
