

Directions: Take one capsule per day or as directed by your healthcare practitioner.

BrocColinate® Activated is a special blend designed specifically to yield up to 24 mg of sulforaphane per capsule in a delayed release capsule for optimal absorption. It contains high amounts of the heavily studied and multi-patented ingredient Sulforaphane Glucosinolate, found in broccoli, broccoli sprouts and broccoli seeds. It also has been specially formulated using a patented CO2 extraction method to preserve myrosinase along with added myrosinase from the broccoli seed. Myrosinase is a key enzyme needed to convert sulforaphane glucosinolate into sulforaphane in the small intestine for enhanced phase 2 detoxification and NRF2 activation.*

The delayed release capsule utilized by this formula is designed to pass through the stomach without degradation caused by stomach acid and release in the small intestine for better absorption into the bloodstream.
