

ProbioMax DDS™

DIRECTIONS: After your bedtime oral hygiene routine, chew one tablet slowly and completely before swallowing, or as directed by your healthcare professional.

Children and pregnant or lactating women should consult their healthcare practitioner prior to use. Do not use if foil is punctured.

ProbioMax DDS™ is a chewable probiotic designed to activate in the oral cavity for support of healthy teeth and gums. As you chew the peppermint-flavored tablet, it releases the safe and powerful DDS-18™ strain of *Streptococcus salivarius*—a beneficial bacterium that normally occurs in a healthy oral cavity. *S. salivarius* DDS-18 then attaches to cells in the oral cavity and colonizes, positively affecting the bacterial population therein and naturally defending the teeth and gums. ProbioMax DDS can be used as a complementary addition to your daily oral and dental health regimen.*
