ABSOLUTELY NO FILLERS ADDED

GlutenEase contains a unique combination of proteases for digesting gluten and casein.* Some individuals may experience difficulty digesting foods containing these molecules. GlutenEase contains the enzyme DPP-IV well known for its ability to break down gluten and gliadin proteins which may reduce the onset of symptoms associated with intolerance.* Amylase and glucoamylase enzymes assist in the digestion of the carbohydrate portion of grains (such as wheat) which often contain gluten.*

Recommended Usage: Take 1 capsule with any meal containing gluten or casein. More may be taken if needed. This product works best when used in combination with **Digest** or **Digest Gold**.*

Our exclusive Thera-blend™ enzymes are effective throughout the entire digestive system, thereby ensuring complete digestion.* When formulated for therapeutic purposes, Thera-blend enzymes are customized for optimal performance throughout the entire body.*
