

WANT TO BE THE MAN YOU USED TO BE?

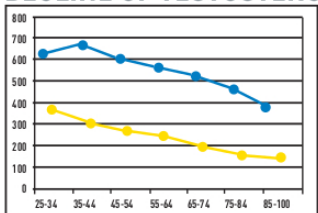

LOW TESTOSTERONE. It's a serious matter. Recent reports have indicated nearly 20 million American men may suffer from "low testosterone syndrome." Of these, an estimated 4 to 5 million men suffer from a condition called "AndroPause," otherwise known as clinically deficient testosterone production—which can cause fatigue, lack of motivation, low sex drive, and an inability to gain muscular body weight (and an uncontrollable increase in body fat).^{Δ†}

You might have heard about low testosterone, or low T, and thought, "that's not me." And yet, you might not be feeling like yourself lately and don't know why. You're not alone.^Δ

FENU TEST™ TO LIVE LIFE TO THE FULLEST! THE BREAKTHROUGH TESTOSTERONE ENHANCER YOU'VE BEEN WAITING FOR!^Δ

But now there's **FENU TEST™**... the testosterone support/anti-estrogen compound that provides a safe testosterone-enhancement option for men who feel the need for increased levels of testosterone.^Δ

DECLINE OF TESTOSTERONE IN AGING MEN[†]

■ **Total T** ■ **Free T**

Total testosterone decreases by about 1% per year in men over the age of 35. Worse, the bioavailable Free Testosterone drops by an even greater amount at 1.2% or more per year.[†]

Start today, and although results may vary, you could experience similar results to those test subjects in the most recent clinical studies, such as restored:^Δ

- **Strength^{Δ†}**
- **Muscle Mass^{Δ†}**
- **Stamina^{Δ†}**
- **Sex Drive^{Δ†}**
