HYDRATION[†]

SUBSTANTIATED EFFECTS

NOxygen® is a stimulant-free preworkout additive designed to create an oxygen-sparing environment through enhancing vasodilation and blood flow with NO3-T® sodium nitrate, while simultaneously volumizing muscle cells and increasing lean body mass with Hydromax® water-soluble glycerine. NOxygen® is perfect for both strength and endurance athletes.[†]

SUGGESTED USE:

Add one to two servings to your preworkout beverage 15-30 minutes before training for maximum blood and oxygen delivery. For endurance training, mix with your intra workout or hydration beverage and consume throughout training.[†]
