

Men have estrogen too (not just women), and the more your body has can actually decrease your testosterone levels. Diindolymethane (DIM) converts strong and damaging forms of estrogen into weaker forms so your testosterone is protected and your balance of testosterone to estrogen ratio is in check.\*

Research shows higher levels of testosterone and low levels of estrogen have been linked to lean muscle mass, an efficient fat-burning metabolism, and low abdominal fat. Olympian Labs formula contains Bioperine®, a patented ingredient added for its ability to increase nutrient absorption.\*

CAUTION: If you are pregnant or nursing, have a medical condition, or are taking medication, consult your healthcare professional before using this or any other nutritional supplement. Discontinue use if allergic reaction occurs.
