

Suggested Use: Adults take 1 capsule in AM and 1 capsule in PM (2 capsules daily). Children consult with a healthcare practitioner before use.

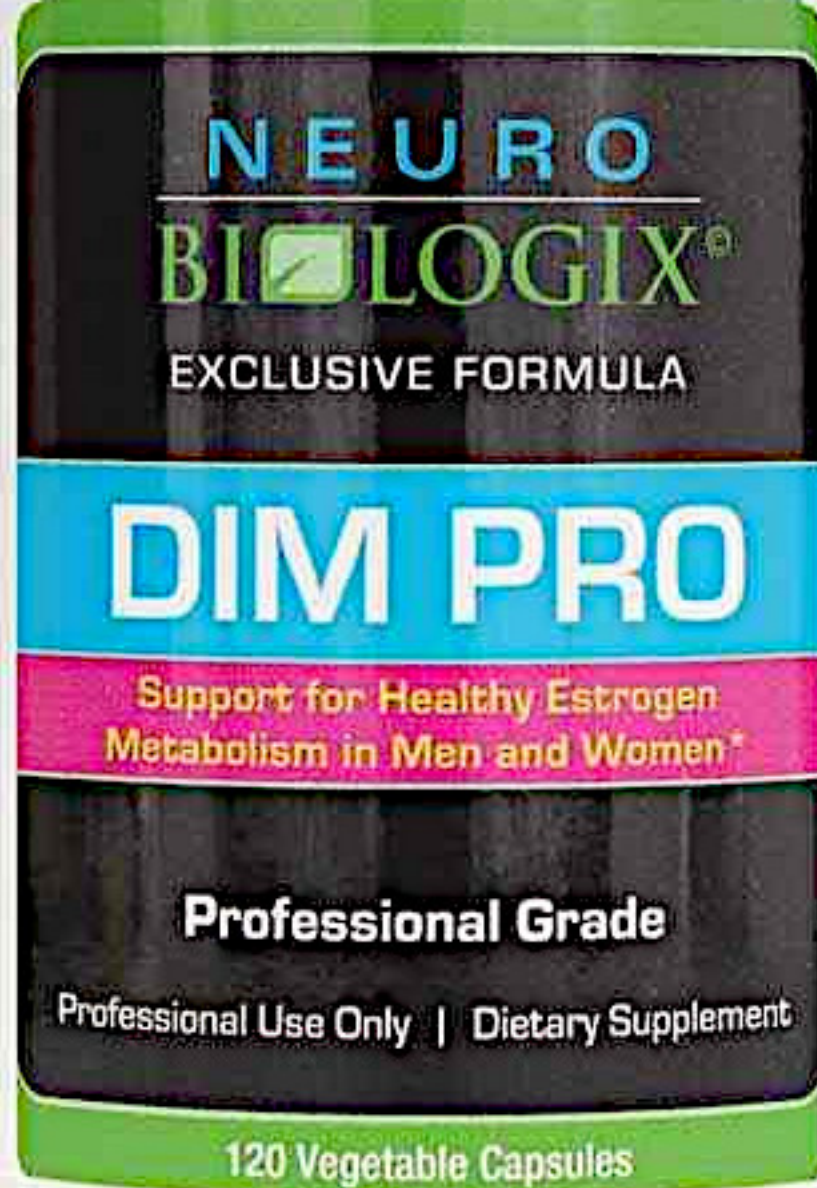

DIM PRO supports healthy estrogen metabolism for men and women. Estrogen dominance may be associated with both environmental toxins mimicking estrogen and compromised metabolism of estrogens. Natural DIM (Diindolylmethane) has been found to increase levels of "good" estrogens (2-hydroxyestrogens) while reducing levels of "bad" estrogens (16-hydroxyestrogens) and may result in a relief of symptoms associated with too much estrogen. DIM is an advanced metabolite of Indole-3-Carbinol, the indole found in cruciferous vegetables.*
