

Suggested Use: Take 1 capsule twice daily or as directed by your healthcare practitioner.

Palmitoylethanolamide (PEA) is a bio-identical fatty acid amide that is normally synthesized by healthy tissue in the human body in response to inflammation. PEA is made by various plants and animals and is present throughout the animal kingdom. PEA can be found in many different tissues including glia, neurons, retina, white blood cells, mast cells and adipocytes. Supplementing with PEA has been scientifically shown to naturally assist in the reduction of inflammation and to have neuro-protective and possibly pain control effects*.
