

Suggested Use: Take 1 capsule in the morning or as directed by your healthcare practitioner.

Pregnenolone Plus is a custom formula that provides Pregnenolone and the active precursor Niacinamide for ultimate delivery of Pregnenolone which is the key precursor pro-hormone involved in maintaining sufficient steroid hormone levels in the body. It plays a role in inflammatory control, sodium/potassium balance, sex hormone production and memory function and is the precursor (building-block) for all other hormones in the body including cortisol, DHEA, estrogen, progesterone, testosterone, and aldosterone. Without pregnenolone there can be no human steroid hormone production. Pregnenolone is known to modulate at least two key nerve receptor systems in the brain: NMDA receptors and GABA receptors. NMDA receptors are involved in learning, memory, and alertness. GABA receptors are involved in mood stability, relaxation, sex drive and sleep.*
