

**Suggested Use:** Adults take 2 capsules in the AM 30 minutes before or after a meal and if needed 2-3 capsules in the evening. Children 5+ take 1 capsule daily or as recommended by your healthcare practitioner. Do not exceed 6 capsules daily.

This formula was designed to assist patients who have difficulty producing adequate amounts of GABA, an important brain neurotransmitter. GABA plays a role in reducing excitability throughout the nervous system, as well as regulation of muscle relaxation. Many patients possess a genetic mutation of GAD (Glutamic Acid Decarboxylase), the primary enzyme that creates GABA. Weakness in the GAD enzyme creates an increased amount of Glutamate, the excitatory neurotransmitter, and a deficiency of GABA. This imbalance creates an overly stimulated nervous system.\*

The 5 key ingredients are designed to assist with:

- Nervousness or Anxiousness\*
- Mood & Muscle Relaxation\*

- Difficulty Falling or Staying Asleep\*
- Improved Sense of Well Being\*

**Caution:** If pregnant or lactating consult with your healthcare practitioner prior to use. Keep out of reach of children.
